PERSONAL PROJECTS

E-commerce Website:-

- Developed an e-commerce platform for selling men's, women's, and kids' clothing with secure user authentication (JWT), role-based access, and dynamic product listings. Implemented shopping cart, checkout with payment integration, and admin dashboard for product management. Added analytics and reporting for sales and user activity tracking.

ReactTube (Youtube Clone):-

- Developed a YouTube clone using React.js, featuring video search, dynamic video listing, and responsive design. Integrated YouTube Data API for real-time video details and suggestions. Implemented user interaction features like video previews and search caching for an enhanced user experience.
